📍 Queens, New York

Education

CUNY Queens College
Bachelor of Science in
Computer Science
August 2023 - Present

**CUNY Queensborough
Community College**
Associate Degree in
Computer Information
Systems
September 2020 - May 2023

Richmond Hill High School
Queens, New York
September 2016 - June 2020

Technical Skills

- Programming Languages: C++, Python, SQL, Java, HTML
- Software & Tools: Microsoft Office Suite (Word, Excel, PowerPoint), Microsoft Visual Studio, Database Management Systems
- Computer Architecture & Systems: Experienced with MIPS assembly language, bitwise operations, and binary number systems
- Analytical & Financial Acumen: Proficient in Excel for data visualization, sales trend analysis, inventory management, and financial modeling
- Core Skills: Effective team collaborator with strong communication, detail-oriented approach, leadership capabilities, and adaptability in fast-paced environments

Objective

Seeking an opportunity where I can contribute and leverage my skills and knowledge to help promote and drive growth to achieve a company's goal.

Work Experience

Gap, INC.
Sales Associate
June 2022 - Present

- Analyzed weekly sales reports to identify high-demand products and optimize inventory placements, contributing to improved product visibility and customer satisfaction
- Utilized Excel to track sales trends and inventory, providing actionable insights for restocking and promotional strategies
- Engaged effectively with customers and team members to create a positive, customer-focused environment

Express
Sales Associate (Temporary)
October 2021 - December 2021

- Managed store layout and product displays, adhering to company guidelines for an organized and inviting shopping space
- Provided tailored product recommendations to customers, enhancing their shopping experience and increasing store sales
- Collaborated with colleagues in a dynamic environment, demonstrating flexibility and team spirit

NYC Department of Youth & Community Development
Mentor, Summer Youth Enrollment Program
July 2018 - August 2018 & July 2019 - August 2019

- Led an environmental education project on global warming, engaging elementary students in interactive learning activities
- Developed public speaking and mentorship skills by explaining project concepts to younger students
- Planned and executed educational initiatives as part of a collaborative team, fostering a supportive learning environment

- Analytical & Financial Acumen: Proficient in Excel for data visualization, sales trend analysis, inventory management, and financial modeling
- Core Skills: Effective team collaborator with strong communication, detail-oriented approach, leadership capabilities, and adaptability in fast-paced environments

Professional Highlights

Programming Proficiency: Skilled in multiple programming languages, including C++, Python, SQL, Java, and HTML, with hands-on experience in building, debugging, and optimizing code

Computer Architecture Knowledge: Practical experience with MIPS assembly language, binary systems, and bitwise operations, providing a solid foundation in low-level programming and digital logic

Analytical & Data Analysis: Strong command of Excel for data analysis and visualization, using advanced functions to interpret sales trends, optimize inventory, and support financial decision-making

Database Management: Knowledgeable in SQL and relational database management, enabling efficient data structuring and retrieval for business applications

Front-End Development: Skilled in HTML and Web Design, with a focus on user-centered website development and UI design

Adaptable Team Player: Demonstrated ability to collaborate in diverse environments, with experience in both technical and customer-focused roles

Technical Toolset: Proficient in Microsoft Visual Studio for development and debugging, Microsoft Office Suite for presentations, documentation, and data analysis

Relevant Coursework

Computer Science & Information Systems

Database Management Systems – Designed, structured, and maintained relational databases, ensuring data integrity and efficient retrieval

Local Area Network Management – Developed understanding of network configurations, troubleshooting, and network security principles

Web Design – Applied front-end development and UX/UI design skills to create responsive and user-friendly websites
